Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Monday 27 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Monday, low cloud slow to lift. Some rain late evening.

Today:
Low cloud, mist and fog patches will be slow to clear, lingering in places throughout, especially over higher ground. The odd brighter spell may develop but these will be isolated. Showery rain spreading from the south through the evening. Maximum temperature 7 deg C (45 deg F).

Tonight:
Extensive low cloud giving mist and fog patches in places, especially over hills. Showery rain becoming more persistent and occasionally heavy towards dawn. Minimum temperature 3 deg C (37 deg F).

Tuesday:
A dull, wet morning. Rain becomes increasingly light and patchy through the afternoon, and as winds freshen, low cloud becomes more confined to higher ground. Some evening cloud breaks developing. Maximum temperature 8 deg C (46 deg F).

Outlook for Wednesday to Friday:
Wednesday, a spell of heavy rain, then drier and brighter. Becoming windy but mild. Thursday and Friday, generally windy but mild, further spells of rain but also some drier interludes.
